

VisiWave CheckAdapter

VisiWave CheckAdapter is a free utility for testing the compatibility of your wireless hardware with VisiWave Site Survey. Using this utility, you can simply and easily determine if your wireless adapter is supported on a Windows laptop computer.

Download and Requirements

You can freely download CheckAdapter by visiting our Download (download.php) page.

CheckAdapter runs on Windows XP/Vista/7/8/10.

Supported Adapters

Presented here is a partial list of the wireless adapters that are supported by VisiWave Site Survey. The list is always growing and just because your adapter isn't listed here, doesn't mean it won't work with VisiWave. Download our CheckAdapter application to test out your wireless adapter. Please post your results to VisiWave to help grow this list.

If your wireless adapter isn't working, make sure you read the help that is provided within the CheckAdapter utility.

The table lists the wireless adapter name and whether it is supported under Windows XP or Windows Vista/7/8/10. For Vista or later the scan rate is also reported. This shows how fast, on average, you can collect data using each adapter.

Wireless Adapter	XP Support	Vista/7/8/10 Scan Rate
11a/b/g Wireless LAN Mini PCI Adapter		3.1 secs
11b/g/n Wireless LAN Mini-PCI Express Adapter II		1.1 secs
